

# Smart recognition - Intelligent action

## Vision

In our workshop, we will begin discussing your AI vision to analyze risk, reduce complexity as much as possible, and estimate budget.

## Feasibility

We will build a prototype to make sure that we meet your demands and to have a basis to define the exact scope of the project.

## Scalability

Using the prototype as a basis we will plan the different workloads to complete your AI Project.

**Workshop**  
800.00 €

Building a click dummy will make sure that we meet your demands and that we have a basis to define the exact scope of the project. The click dummy consists of a front end with no back end.

With the click dummy, you can get first impressions on the web and invite your share- and stake holders to an impressive project review.

The click dummy serves as a scope visualisation and also to roughly estimate the costs of the project realization.

- Feasibility
- Cost estimation
- Definition of workloads
- First impression of product
- Get customer feedback

## Quality first

To meet your expectations. Quality in our understanding is an output which is maintainable in a simple way.

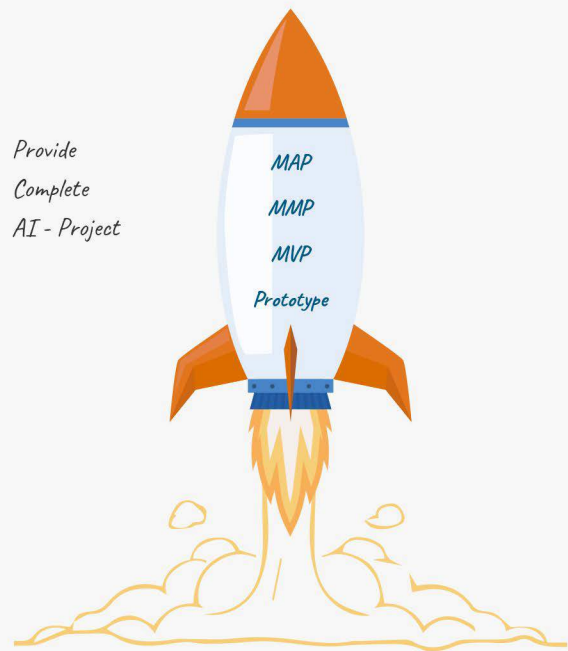

### Meet the Expectations

In mutual workshops we develop your requirements carefully so that during the implementations there won't be any unexpected surprises.

### Develop safe

On an agile and lean oriented spirit we will guide you safely through the development and implementation phases of your AI project.

## About us

Our company was founded in June 2017.

**David Moyses**

Founder/CEO

MSc in Mechatronics / Udacity Nanodegree in AI and in Computer Vision.

**Rahel Moyses**

Administrator/Project Manager

Responsible for Finances and Legal
